Historical Note

The Arkansas Department of Finance and Administration (DFA) was created by Act 38 of 1971 allowing a substantial reorganization of sixty government agencies into just thirteen cabinet departments. The DFA's mission, according to its website, is to carry out its statutory responsibilities in a service-oriented manner while maintaining a high degree of fiscal integrity and to strive to improve management of financial resources statewide by providing all activities of State government a fully adequate accounting and reporting system, reducing administrative paperwork and the time required to comply with the policies of the Department of Finance and Administration.

The DFA Office of Budget is responsible for the administration of the deficit prohibition law and implementation of the annual operations plans for state agencies, preparation of the state's biennial budget, and providing technical and fiscal expertise to the various branches and agencies of government.
